2.2. KSZ maakt bericht T820 M over aan ISS

Enkel wanneer KSZ-controles van bericht T820 M geen problemen opleveren, wordt het bericht doorgestuurd naar de geïnteresseerde instellingen van sociale zekerheid.

KSZ voegt de timestamp van distributie toe.

```
<!ELEMENT T820 (Identifier, Quarter, EventTimeStamp, Total)>
<!ATTLIST T820
    processType M #REQUIRED
    messagType distribution #REQUIRED>
<!ATTLIST EventTimeStamp

    indicator 031000 #REQUIRED
    indicator 999999 #REQUIRED>
```

2.3. KSZ antwoord aan RSZ(PPO)

2.3.1. Positief antwoord

Een positief antwoord aan RSZ(PPO) houdt in dat bericht T820 M door KSZ doorgestuurd is naar de geïnteresseerde instellingen van sociale zekerheid. KSZ geeft de timestamp van distributie mee en het resultaat van verwerking.

```
<!ELEMENT T820 (Identifier, Quarter, EventTimeStamp, Total, Result)>
<!ELEMENT Result (Code, Explanation?)>
<!ATTLIST T820
    processType M #REQUIRED
    messagType answer #REQUIRED>
<!ATTLIST EventTimeStamp
    event download #REQUIRED
    event distribute #REQUIRED>
<!ATTLIST Total
    indicator 010000 #REQUIRED
    indicator 014000 #REQUIRED
    indicator 031000 #REQUIRED
    indicator 999999 #REQUIRED>
```

2.3.2. Negatief antwoord

Een negatief antwoord aan RSZ(PPO) houdt in dat bericht T820 M niet doorgestuurd is. KSZ voegt logischerwijs GEEN datum van distributie toe!

```
<!ELEMENT T820 (Identifier, Quarter, EventTimeStamp, Total, Result)>
<!ELEMENT Result (Code, Explanation?)>
<!ATTLIST T820
    processType M #REQUIRED
    messagType answer #REQUIRED>
<!ATTLIST EventTimeStamp
    event download #REQUIRED>
<!ATTLIST Total
    indicator 010000 #REQUIRED
    indicator 014000 #REQUIRED
    indicator 031000 #REQUIRED
    indicator 999999 #REQUIRED>
```

3. Consultatie A820, L

3.1. De vraag

Verschillende combinaties van vragen (Requestblokken) zijn mogelijk.

Rechtstreeks een bepaald attest opvragen (Het INSZ en het trimester moeten worden opgegeven als bijkomende controle).

1. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, attestnummer, enkel laatste situatie
2. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, attestnummer, alle situaties
3. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, attestnummer, situatie-nummer (geeft opgegeven situatie)

Diverse selectiecriteria, de laatste situatie

4. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, enkel de laatste situatie
5. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, enkel de laatste situatie, inschrijvingsnummer werkgever
6. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, enkel de laatste situatie, inschrijvingsnummer werkgever, werkgevercategorie
7. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, enkel de laatste situatie, inschrijvingsnummer werkgever, werkgevercategorie, werknemerscategorie
8. RSZ en/of RSZPPO, online of batch, periode, INSZ, enkel de laatste situatie, inschrijvingsnummer werkgever, werknemerscategorie

Diverse selectiecriteria, alle situaties

9. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, alle situaties
10. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, alle situaties, inschrijvingsnummer werkgever
11. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, alle situaties, inschrijvingsnummer werkgever, werkgevercategorie
12. RSZ en/of RSZPPO, on-line of batch, periode, INSZ, alle situaties, inschrijvingsnummer werkgever, werkgevercategorie, werknemerscategorie
13. RSZ en/of RSZPPO, online of batch, periode, INSZ, alle situaties, inschrijvingsnummer werkgever, werknemerscategorie

Er wordt on-line een vraag gesteld [Request]. In de vraag staat vermeld of ze onmiddellijk moet verwerkt worden (on line) of pas later (batch). In alle gevallen wordt de vraag steeds teruggestuurd met een resultaat-code [X001].

Als de vraag niet goed verwerkt is krijgen we een negatief antwoord. De vraag wordt teruggestuurd met de resultaat-code [Request] + [X001].

Als de vraag niet onmiddellijk moet verwerkt worden en goed ontvangen is, krijgen we een intermediair antwoord [Request] + [X001].

Als een attest gevonden wordt krijgen we een positief antwoord. Voor de consultatie A820 wordt dan een attest A820 meegestuurd [Attestation], eventueel met een verwijzing naar een ander attest dat voldoet aan de vraag [Next]. Als de aanvrager vervolgens dezelfde vraag

opnieuw stelt, samen met deze verwijzing ([Next]), dan wordt het volgende attest teruggestuurd dat voldoet aan deze vraag.
Als het attest te lang is, wordt het eerste deel teruggestuurd met een aanduiding dat het een deel-attest betreft [Request + Attestation + Part]. Als er bovendien nog een volgend attest is dat aan de vraag voldoet, zal er zowel een Part-blok als een Next-blok teruggestuurd worden [Request + Attestation + Part + Next]

Om het volgende deel te verkrijgen moet bij de vraag 'Part' gevoegd worden [Request + Part] met daarin welk deel opgevraagd wordt. Om dit deel terug te kunnen vinden hebben wij bovendien het 'AttestationSituationNbr' nodig. **Daarom moeten in de 'Request' bij het opvragen van een deel 'AttestationIdentification' en 'AttestationSituationNbr' ingevuld zijn !** Dit deel wordt dan opgezocht en onder de vorm van een deel-attest teruggestuurd. Om het XML-schema te respecteren mogen de velden 'NLOSSRegistrationNBR', 'CompanyID', 'EmployerClass' en 'WorkerCode' niet (meer) ingevuld zijn in 'Request' wanneer 'AttestationIdentification' ingevuld is. De andere gegevens uit het Request-blok worden gewoon overgenomen.

Voorbeeld zonder next:

Vraag		Antwoord
[Request]	→	[Request][Attestation][Part 1 van 3][X001]
[Request][Part 2 van 3]	→	[Request][Attestation][Part 2 van 3][X001]
[Request][Part 3 van 3]	→	[Request][Attestation][Part 3 van 3][X001]
[Request][Part 4 van 3]	→	[Request][Part 4 van 3][X001] (fout: deel niet gevonden)

Voorbeeld met next:

Vraag		Antwoord
[Request]	→	[Request][Attestation][Part 1 van 3][Next][X001]
[Request][Part 2 van 3]	→	[Request][Attestation][Part 2 van 3][Next][X001]
[Request][Part 3 van 3]	→	[Request][Attestation][Part 3 van 3][Next][X001]
[Request][Next]	→	[Request][Attestation][Part 1 van 3][X001] (dit volgende attest heeft ook meerdere delen, maar geen Next meer)
[Request][Part 1 van 3][Next]	→	[Request][Part 1 van 3][Next][X001] (fout: een Part en een Next mogen niet samen opgevraagd worden).

Enkele toelichtingen bij de voorbeelden:

- Indien een vraag wordt gesteld met een Part dat verwijst naar een deel dat niet bestaat krijg je een foutief antwoord (deel niet gevonden).
- Als een volgend attest aan de vraag voldoet krijg je in elk deel-antwoord een Next.
- Als in de vraag zowel een 'Part' als een 'Next' staat, krijg je een foutief antwoord (Part en Next mogen niet samen opgevraagd worden).

Deze gegevens die de personeelslijst identificeren (Quarter, NLOSSRegistrationNbr, enz...) worden, slechts 1 maal gegeven en vervolgens kunnen tot maximaal 80 attestreferenties volgen. Er is voorzien per record een maximum aan gegevens door te geven. Dit kan dus zowel één personeelslijst zijn met 80 attestreferenties, als 40 personeelslijsten met elk 1 attestreferentie. Het is wel zo dat elk record één volledig en coherent bericht bevat.

Met andere woorden: het bericht zal NIET midden in een tag en NIET midden een gegevensveld worden afgebroken. Het gegevensgedeelte zal steeds een volledig en coherent XML-bericht zijn.
